THE YELLOW TRIANGLE RETRACES THE TRADE FROM THE 16TH CENTURY, IT EXISTS AS A MILITARY ROUTE BETWEEN FETAL, NDOX, REEW, DIGG SUUF AND SUNUGAAL

In August 2016 the European Union ordered Ireland to collect \$14.6 billion in unpaid taxes from Apple. These events have not only brought to light the methods Apple uses to evade tax, but probably also other tech giants based in Ireland's "Silicon Docks", such as Facebook, Twitter, Google and Linkedin. Apple managed to establish a privileged deal with the government of Ireland which allowed it to routinely pay less than 1% tax. Apple did this by applying two different tax strategies known as the Double Irish Arrangement and the Dutch sandwich. The taxes that Apple payed are astonishingly low.

In 2014, for every million dollars in profits it payed only 50 in taxes, that is 0.005% of its total income. This reveals a system that clearly enables inequality by allowing the biggest and wealthiest people in the world to pay proportionally insignificant amounts of money.

This game is about the current dispute between the European Union and Apple, regarding several desicions yet to be made. It requires two players that will answer questions in their turn. The goal is to make the most money by making the right desicions.
