Scenario Cher

1. Cher is a time share robot for fellow citizens in the neighbourhood that want to lose weight. By sharing the robot, people can motivate each other and start competing.

2. If Cher is at your home, she will help you in making choices with your diet (like weight watchers) and helps you with exercises, that she will project on the wall. Relatives and friends can also provide images and sounds to make exercising more attractive.

3. The amount of exercises, muscle tension and other key data is measured. Your results will be reflected in the appearance of Cher.

4. In the morning, when Mr. Janson wakes up he finds Cher asking to do some of his exercises. Cher projects birds on the wall for Mr. Janson to catch.

5. Cher challenges Mr. Janson to outrun himself, and when he weakens she will show boredom, so that he will be stimulated to get her back to her normal reaction.

6. The progress that Mr. Janson has made is shown by Cher on a display.

7. At noon, it is time to bring Cher to Mrs. Brown who lives further down the street. Mr. Janson helps Cher getting down the stairs and walks with her to Mrs. Brown.

8. Mrs. Brown decides to do some of her exercises before lunch and turns on Cher. She is making knee bends to enforce her muscles and Cher will make a sound with every bend. Mrs. Brown tries to find the right rhythm, if she succeeds, a background tune will start playing.

9. Finally, Mrs. Brown brings Cher to Mrs. Trifle.
